Support for this is Claims 9 and 10 as originally filed. Claim 11 has been amended to change the dependency from Claim 10 to Claim 1. Claims 9 and 10 are cancelled hereunder without prejudice. The rejections are traversed as far as they relate to the claims remaining in the instant application. It is believed that the amendments overcome the Examiner rejections. None of the references teach or suggest either expressly or implicitly a particle core *inter alia* which is an agglomerate having a surface with irregularities and crevices and a particle coating at least partially covering the particle core wherein the particle core comprises a water soluble coating wherein the particle layer comprises a water soluble coating material, wherein the particle coating layer provides a surface area reduction of at least about 10% and wherein said detergent active material in said particle core a blend of surfactants and dry detergent ingredients which comprise a blend of anionic surfactants and alkali metal carbonates.

In light of the above amendments and remarks, it is requested that the Examiner reconsider and withdraw all rejections. Early and favorable action in the case is requested.

Respectfully submitted,
